

Cosumnes Subbasin Working Group
*****Monthly Updates – January 2021*****

Below are brief updates related to SGMA implementation in the Cosumnes Subbasin. To keep Working Group conversations focused on GSP development, we are not planning to cover most of this material during the January 20, 2021, Working Group meeting. However, if there is a topic below that you believe merits discussion with the full Working Group, please let us know and we will do our best to work it into the agenda.

- **Public Workshop outreach underway.** The Outreach and Engagement Committee is firming up plans for the February 24, 2021, public workshop. Kathy Beasley drafted a press release that was included in the Wilton News (see attached). More details will be shared at the Working Group meeting.
- **Tribal outreach.** Several GSA representatives are meeting to discuss ways to strengthen outreach to tribal representatives as GSP development moves into its final year. Specific ideas being discussed will be shared at the Working Group meeting.
- **ESJ / South American updates.** The Board is considering a white paper on management principals to help guide them in developing projects. Also, based on lessons learned discussion, they will be focusing on four areas in the future: funding, water availability, partnerships, and stakeholder engagement. The multi-completion TSS well has been installed at the Dry Creek boundary.
- **Dept of Conservation SGMA Watershed Coordinator grant.** Southeast Sacramento County Groundwater Authority received notification that its grant proposal was accepted. Official announcements of grant recipients are expected by the end of January.
- **Grants.** Sacramento County submitted Invoice # 8 (July 1, 2020 to Sept 30, 2020) to DWR for approximately \$280,000.
- **Tracking Logs.** A reminder to GSAs to closely track all outreach efforts within your jurisdiction as this is a key requirement under SGMA. This includes SGMA-focused public meetings being led by your GSA, email updates out to constituents, survey efforts, etc. Please use the tracking log CBI distributed to all GSAs following the November 2020 Working Group meeting.
- **DWR Updates.** Please see the additional handout for updates from the Department of Water Resources.
