

You are  
invited!

Public Workshop:  
**Managing Groundwater  
in the Cosumnes Subbasin**

WEDNESDAY

**March 24th**  
6:30-8:00pm

Register at

[bit.ly/CosumnesSGMA\\_Mar24](https://bit.ly/CosumnesSGMA_Mar24)

**What will be discussed?**

A plan to stop depletion of groundwater in the Cosumnes Subbasin

**Who should attend?**

Everyone who has a well or receives well water in their home.

Workshop will be online and have in-person meeting options (subject to change due to COVID restrictions). Register to learn more.

**Groundwater Sustainability Plan**

In response to a state law enacted in 2014, a roadmap for how groundwater will be managed over the next two decades will be finalized this year. The goal is to stop removing more water from underground aquifers than is replenished each year by nature or humans.

**What is in the Plan?**

With a target of 20,000 acre/feet per year, the Cosumnes Subbasin plan includes projects that put more winter flood water into the aquifer (recharging) and options that reduce usage (volunteers who fallow agricultural land or restrict pumpage).

**What is the Impact on You?**

The good news is that an effective plan will mean that people will be able to count on their wells even in dry years. But there are costs to implement and monitor whatever plan is adopted. Participate in upcoming public workshops to learn more about these funding needs to support the plan.

**We look forward to seeing you!**
