

You are
invited!

Public Workshop:
**Managing Groundwater
in the Cosumnes Subbasin**

**TWO OPPORTUNITIES
TO PARTICIPATE**

Virtual Webinar
June 2nd
6:30-8:00pm

In-Person Workshop
June 3rd
6:30-8:00pm
at Herald Fire Station #87

Choose to attend either the virtual webinar or the in-person meeting. The same material will be covered at both meetings.

Go to **Cosumnes.WaterForum.org** to register for either event.

Groundwater Sustainability Plan

In response to a state law enacted in 2014, a roadmap for how groundwater will be managed over the next two decades will be finalized this year. The goal is to stop removing more water from underground aquifers than is replenished each year by nature or humans.

What is in the plan?

With a target of 20,000 acre-feet per year, the Cosumnes Subbasin plan includes projects that put more winter flood water into the aquifer (recharging) and options that reduce usage (volunteers who fallow agricultural land or restrict pumpage).

What is the impact on you?

The good news is that an effective plan will mean that people will be able to count on their wells even in dry years. But there are costs to implement and monitor whatever plan is adopted.

What will be discussed?

At this workshop, local agencies will present the proposed approach for long-term implementation of the plan, including the fee approach to support plan implementation.

Who should attend?

Everyone who has a well or receives well water in their home.

We look forward to seeing you!
